IP Strategies for Inventions in Biotech

5 May 2021 | 16-17 CET

Dr. Sebastian Tegethoff

Why should anyone care about Intellectual Property (IP) protection? How this protection may support your translational research? How IP protection strategies in biotech differ from other fields?

In this seminar, **Dr. Sebastian Tegethoff**, an experienced legal adviser in developing IP strategies for research institutes and biotech companies, will give us an overview of relevant IP rights for biotech innovations, the context of IP in product development and characteristics of IP protection in life sciences.

Dr. Sebastian Tegethoff majored in biology at the University of Goettingen, Germany. He obtained a doctorate from the Max-Delbrück-Centre, Berlin in molecular medicine, studying molecular-genetic and biochemical protein-protein interactions, immunology and signal transduction. He qualified as a German patent attorney after studying in a Berlin IP law firm and then went on to establish his own law firm. In 2008 he joined the 24IP Law Group. He is a lecturer on patents and employee invention rights at the Fernstudieninstitut der Beuth Hochschule für Technik in Berlin and expert of European IP helpdesk.

The webinar series is open to all **SPARKees**, **SPARK mentors**, and **students and staff of SPARK associated organizations**. **Registration to the webinar is required**. Please register latest on **May 4th** at:

https://zoom.us/meeting/register/tJwtdO-prDwrGNAtCs_0xWESpwtzPBL6lnh

With later registrations access cannot be guaranteed. There are limited number of places available, and they are filled in in the order of registration.

The organizers reserve the right to change and update the topics and speakers
