

## Dear Health Innovation Enthusiasts,

We would like to invite you to the online **FINAL I4H PITCH EVENT Program** on **13.12.2021 from 16:00 - 18:30 o'clock**.

The I4H pilot is now coming to an end, and we would like to give all I4H teams a stage to present their ideas and growth during the I4H program.

The I4H was initially designed as a pilot program to enhance the development of breakthrough medical innovations and help create a new generation of inventors.

On this final pitch day, advisors, jury members, and other supporters of the program get the chance to see how the ideas developed and get the opportunity to provide the teams with even more tips and valuable network opportunities.

Finally, we all will get an interactive insight into the program and ultimately, we want to create a nice closing for the I4H Pilot Program 2021.

**We would be very happy about their participation. Please register via the following link:**
